Ladrilho hidráulico, também conhecido como piso hidráulico é um revestimento confeccionado por meio de técnicas artesanais que tem tudo a ver com o Armazém das Oficinas. Cada ladrilho hidráulico é produzido um a um, manualmente com a utilização de formas metálicas e variadas cores, resultando em centenas de possibilidades de composições.

Por um longo período, o ladrilho hidráulico deixou de ser utilizado, justamente pela forma artesanal e tempo de produção. Atualmente valorizado e amplamente indicado por arquitetos e decoradores, o ladrilho hidráulico proporciona ambientes totalmente exclusivos. Aplicados nos pisos, podem formar tapetes exclusivos e aplicados em paredes formam ambientes únicos. Uma combinação muito adotada nos dias atuais é o patchwork, que utiliza diferentes estampas e cores, resultando em composições alegres, divertidas, vivas, que refletem a criatividade dos clientes.

Além dos belos ladrilhos decorativos, a oficina também produz pisos táteis, pisos para rampas e ladrilhos para calçadas 25 dados. A oficina abriga 18 artesãos e está em atividade desde 2004.
